The European School Survey Project on Alcohol and Other Drugs

Application form for the use of the ESPAD 03 database

Date:
29 April 2009

Person responsible for the dataset[1]
Name: Anna Kokkevi
Country: Greece

List of authors (preliminary):
Anna Kokkevi, Angeliki Arapaki, Deborah Olszewski, Salme Ahlstrom, …

Working title of the project:
The association between reported suicide attempts and polydrug use among 16-year old adolescents: a cross-national study from 18 ESPAD countries.

Research question(s):
1. Is there an association between polydrug use and suicide attempts?
2. Is the pattern of the association similar or different among different sociocultural contexts?

Abstract: (Please describe objectives, methods and specify the research question(s), maximum 250 words.)
Objectives: To study the association between reported suicide attempts and polydrug use in different countries.
Method: Analysis to be based on survey data from school students in 18 ESPAD countries. Polydrug use is defined as the use of more than two substances during lifetime and/or the last 30 days. Regression analysis methods will be applied to the data in order to examine the pattern of the association among different sociocultural contexts.

Planned type of publication: ☒ Paper/article ☒ Report ☐ PhD
☐ Other, which:

Variables to be included in the analysis:
esp01
esp07, esp08
