Working title of the project:
The impact of alcohol, marijuana and family background on school grades of european youth.
Differences between Eastern and Western Europe.

Work Plan: (Please describe objectives, methods and specify the research question(s), maximum 250 words.)
The main aim of this study is to examine the impact of alcohol and marijuana abuse and family background (problems with parents or the financial situation of the family) on school grades of young people. The research will be based on econometric methods such as categorical dependent variable models and principal component analysis. The main research question focuses on the relation between alcohol, marijuana abuse, family structure and childrens school grades. If such a relation exists, what are the differences between Eastern and Western European countries. The research will be based on 2007 data for Croatia, Denmark, Germany, Hungary, Italy, Latvia, Lithuania, Netherlands, Poland, Serbia, Sweden and Ukraina.
