Working title of the project:

Gender and social inequalities in alcohol use among adolescents in 31 European countries

Research question(s):

Are gender disparities in alcohol use among adolescents linked to gender inequalities in societies?

Abstract: (Please describe objectives, methods and specify the research question(s), maximum 250 words.)

The purpose of this study is to provide a typology of alcohol use among 16-year-old teenagers in 31 European countries in 2003, and to examine its relationships with the socioeconomic situation of countries, and specifically with the level of wealth and gender disparities.

Planned type of publication: Paper/article Report PhD
 Other, which:

Variables to be included in the analysis:

all alcohol frequencies of use during last 30 days including binge drinking, drunkenness during last 12 months and 30 days, last place of drinking ; gender, frequencies of outings, truancy, tobacco use during last 30 days, level of education of each parent, persons living at home with the respondent, satisfaction of the relationships with father and mother.

¹⁾ This can only be a Principal Investigator or a Chair of an ESPAD Thematic group.
