Variation in experienced harms and drinking experience among 15 to 16 year-old adolescents from a European perspective: A Multilevel Analysis

Research question(s)

Study aims to investigate the variation in experienced harms and drinking experience among 15 to 16 year-old adolescents in (xx) European countries.

1) What is the difference between countries?

2) To what extent can the difference be explained by country-level factors and by individual-level factors?

¹⁾ This can only be a Principal Investigator or a Chair of an ESPAD Thematic group. When the application is approved the Principal Investigator/Chair of a Thematic group has to sign an agreement that the delivered dataset only will be used for the applied project and that all use of the dataset will be done according to the rules in the document "Rules for the use of ESPAD databases".

²⁾ The meaning of the levels can be found in the document "Rules for use of ESPAD databases".

³⁾ If level 2 data should be included, the application needs to be accompanied by a written confirmation from the Principal Investigator in the country/ies concerned.
